Notice of a Public Meeting

Walnut Street Reconstruction Project

Thursday, January 31 at 7:00pm

Select Chamber, Clinton Town Hall, 242 Church Street

In 2019, the Town of Clinton will be reconstructing Walnut Street between Church and Water Streets. This project will include the replacement of water lines, as well as on-street parking, new sidewalks, curbing, lighting, and landscaping.

On Thursday evening, January 31, the Town's Community & Economic Development Office will host a project meeting/ informational session in the Select Chamber of Clinton Town Hall. This meeting will provide the residents of Walnut Street and interested citizens the opportunity to meet with town staff as well as the project engineer, Mike Carter of GCG Associates of Wilmington, MA.

This meeting is an opportunity to learn about the proposed construction schedule, anticipated disruptions on the street, to discuss how the project team can best communicate with residents during construction, and to review the design for new work.

All are welcome to attend. Comments may also be addressed to Phil Duffy, the Town's Director of Community & Economic Development, by telephone at (978)365-4113, or by email at pduffy@clintonma.gov.

The Walnut Street Reconstruction Project is funded by a Community Development Block Grant, awarded by the Massachusetts Department of Housing and Community Development.

Philip Duffy, Director
Community & Economic Development Office
